

Appeal for Malaysia Floods November 2024

For change, CREST is doing it differently this year.

We have been busy this year setting up risk-reduction measures to mitigate the impact of the monsoon season.

Working with government agencies and local NGOs, we stocked their evacuation centres with disinfectants to reduce infections due to overcrowding. Villagers assembled thirty-four 12 by 12-foot rafts and placed them in vulnerable areas prone to inundation.

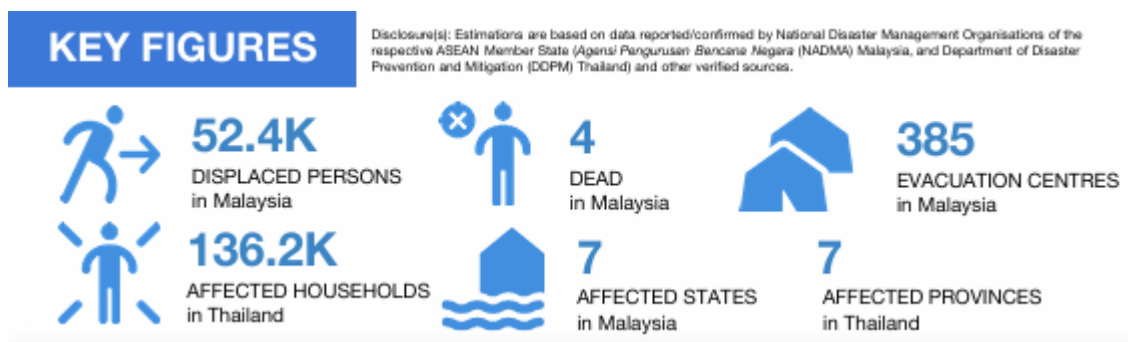

Distributing disinfectants to Angkatan Pertahanan Awam Malaysia

Rafts to reduce loss of electrical appliances

Despite these preparations, global warming and climate change resulted in unprecedented rainfall.

As of 28 November 2024, over fifty thousand residents in Peninsular Malaysia have been displaced.

Together we can make a difference.

Remember, you don't change the world with the ideas in our minds alone, but with the convictions in our hearts.

We hope you can partner with CREST in these worthy efforts. It could be voluntary efforts or financial support in our operations.

Thank you and God bless you all,
The Board at CREST.
