

Instructions

Read the data in the attached five reports from earthquake and flood areas which CREST responded to.

Two are assessment reports while the others are nutrition, water and mobile medical data.

Assessment reports

Think about the usefulness of these reports.

Can it be improved? What are criteria would you like to add?

Nutrition assessment

Is it useful for short term or long term solutions?

Was it easy to obtain these assessments?

Think about possible solutions for under-nutrition after reading these reports.

Water assessment

Are these important for earthquake areas?

How do you test whether the water is safe for drinking?

How can you make water safe for drinking?

Mobile medical camps

Have you been or participate in one?

What is the impact on the community/ Short or long term?

Is there anything interesting from the data? Comments.

Note: All comments will be appreciated as we view them as constructive criticisms for improving our response. Thanks.
